NATALIE CHAMBERS
SOCIAL SCIENCES ACCESS

"Returning to study was by far my biggest challenge. I have three young children and with the youngest in pre-school I had the challenge of childcare, different pickups and a husband that worked shifts! My experience at New College was great. I could not fault the teaching or support and felt from my experience most of the tutors would go above and beyond to support me.

The qualifications gained have boosted my confidence and gave me entry into university and subsequently a degree so that I could have the career I wanted. I had spent most of my adult life working in Sales and starting from scratch was a big decision that puts a lot of people off.

I would say to anyone questioning whether to make a career change or to go into higher education to just go for it. I had wise words said to me when I first started and felt unsure due to the time scale and they were 'the time passes anyway, you can either sit and let it pass or do something in that time that could literally change your life.'

NATALIE HAS JUST COMPLETED HER DEGREE AND BEEN OFFERED A JOB ON A NEW CAREER PATH.

STUART JACKMAN
ACCESS DISTANCE LEARNING
HEALTH PROFESSIONALS

"If you want to improve your prospects and learn something new I would definitely recommend the Access to Higher Education courses. My experience has given me a lot of confidence and the belief that I can go onto achieve a degree – something that I never thought I would at my age!

I was inspired to study by a wish to advance my prospects. Having a family I could not just stop working so a part-time distance learning course I could do at my own pace was ideal. This enabled me to study at my own pace, around the kids and work and I really enjoying studying and learning something new.

There was a wide range of tasks to complete as part of the Access course such as essays, posters and presentations which is really useful experience for university.

I have achieved my credits with distinction and have been offered a place at the University of West of England in Bristol to study for a Diagnostic Radiographer degree."
